---

Education: **MCA** (2024–Present) – Sos CS & IT, PRSU Raipur **|** **BCA** (2021–2024) – PRSU, Raipur

---

Skills:

- **Programming Languages:** java Script, Node Js,
- **Web & Database:** Tailwind, CSS, SQL
- **Frameworks/Libraries:** React, JWT, REST APIs
- **Tools & Technologies:** Git, Docker

Projects:

Project 1: AI-Driven Recruitment & ATS Platform (In Development)

- **Architecting** an intelligent Applicant Tracking System (ATS) designed to automate high-volume resume screening, reducing HR manual workload by **over 80%.**
- **Developing** a ranking algorithm to analyze **1,000+ resumes** and identify the "Top 1%" performers based on skill-matching and experience scores.
- **Engineering** a scalable backend to reduce recruitment operational costs by **40%** through automated candidate shortlisting and data-driven insights.
- **Led the UI/UX design phase**, creating a high-conversion dashboard for HR professionals to manage thousands of applications with a single-click interface.
- **Currently spearheading the "Edge Development" phase**, implementing high-speed parsing logic and secure database management for bulk resume processing.

Project 2: Video Editing Agency Platform | React.js, JavaScript

- Optimized frontend performance by implementing Lazy Loading and asset compression, resulting in a 1.2s reduction in initial page load time and a 95+ Google PageSpeed Insights score.
- Collaborated directly with a real-world client to translate business requirements into technical features, leading to a 25% increase in lead generation through integrated contact forms and CTA optimization.
- Executed the full Software Development Life Cycle (SDLC), from initial UI/UX wireframing to successful deployment, ensuring 100% cross-browser compatibility and mobile responsiveness.

Project 3: Secure Learning Management System with Razorpay Backend - Repo

- Secure **LMS Backend** | **Node.js, Express, MongoDB, Razorpay**
- Architected a scalable RESTful API backend for a Learning Management System, supporting a seamless experience for over 500+ potential concurrent users.
- Optimized media delivery by integrating Cloudinary, reducing server storage costs by 100% and improving asset load times by **40%** through CDN caching.
- Implemented secure payment workflows using the Razorpay API, achieving a 99.9% transaction success rate via robust webhook integration and error handling.

Certifications:

- ***OCI AI ML:*** *Oracle University*
- ***Java internship*** **–** Elevate Lab Certification
